

To: Tim Spahr
IAWN Manager

Poland, 6.02.2021

Dear Tim,

as the Founders of the 6ROADS Company, with the present letter we would like to express our sincere intention to join the International Asteroid Warning Network (IAWN). Being aware of the importance of the NEO research, planetary defense, and spreading the awareness of the threats conjoined with these topics, we will be delighted to participate in the IAWN activities.

The 6ROADS Company is an independent, private entity, which owns eight remote observatories:

- Polonia Observatory in Chile
- Beata Observatory in the USA
- Springbook Observatory in Namibia
- Nagano Observatory in Japan
- Idgrasil Observatory in Spain
- Rantiga Observatory in Italy
- Oborniki Observatory in Poland
- Solaris Observatory in Poland

Each setup is optimized for efficient surveillance and tracking of satellites, space debris and asteroids. The implemented systems enable conducting unattended observations with precise data outputs, including TDMs and astrometric data in various formats. The 6ROADS Company is currently involved in several projects in the field of Resident Space Objects observations supervised by ESA and the European Commission.
