

Dr. Tim Spahr
IAWN Manager

Northolt, June 11th, 2019

Dear Tim,

We are writing to you as co-founders of the Northolt Branch Observatories (NBO), an amateur observatory in London, UK, that started its astrometric programme in September 2015.

Our primary aim is to follow up objects that are placed on the NEO confirmation page, down to 20th magnitude. Our secondary goals are, to reduce the uncertainties of objects placed on the Spaceguard Central Node's Priority List, to perform physical studies of Near Earth Objects, and last but not least, to do public outreach about small Solar System bodies.

It is our intention to join IAWN and to contribute to its efforts. We have read the IAWN Charter and understand the obligations of IAWN members.

Regards,

Guy Wells FRAS

Daniel Bamberger
